

NINA VARDOSANIDZE

Backend Developer

Tbilisi, Georgia | +995 555 952 477 | 29/11/2006

ninavardosanidze06@gmail.com | Nina Vardosanidze

TECHNICAL SKILLS

Languages

- TypeScript
- SQL (PostgreSQL)
- Basic C++
- HTML/CSS
- JavaScript, React

Backend Engineering

- Node.js
- REST API Design & Implementation
- Backend Architecture
- Multi-branch Git Workflows

Cloud & Automation

- Microsoft Azure
- Power Apps
- Power Automate
- AI Builder (Sentiment Analysis)
- SharePoint Ecosystem
- XAMPP

Tools & Methodologies

- Git, GitHub
- ClickUp
- Agile/Scrum Methodologies
- Code Reviews
- Workflow Automation
- Office 365 Apps
- RStudio

AI Developer Tools

- Cursor
- Claude
- ChatGPT
- Gemini

(leveraged daily for accelerated debugging and code design)

LANGUAGES

Georgian: Native

English: B2 (Upper Intermediate)

Russian: C1 (Advanced / Fluent)

PROFESSIONAL SUMMARY

Innovative Backend Developer with a strong track record of engineering scalable backend architectures, RESTful APIs, and cloud automation workflows. Experienced in cloud technologies, including Microsoft Azure, Power Apps, Power Automate, and all Microsoft 365 apps. Hands-on expertise in Node.js, TypeScript, and robust database management (PostgreSQL, MongoDB). Deeply passionate about AI integration and workflow efficiency, actively leveraging AI coding assistants (Cursor, Claude, Gemini) to optimize development velocity. Proven capability in agile startup settings and cross-functional collaboration. Seeking opportunities to contribute to data-powered and AI-driven systems.

PROFESSIONAL EXPERIENCE

Backend Developer

Nov 2024 – Present

Tourlify — Remote (Georgia)

- Engineered and maintained core scalable backend services utilizing Node.js and TypeScript within a fast-paced, agile startup setting.
- Successfully managed 15+ branch creations and 30+ production-ready commits, collaborating seamlessly via ClickUp and strict Git workflows.
- Designed, built, and optimized several crucial endpoints and features, including:
  - **Core Logic Modules:** Engineered complete backend systems for Hotels, Restaurants, Tours, and General Tasks.
  - **Business Analytics:** Aggregated multi-table database records to serve optimized JSON payloads for frontend metrics and analytical charts.
  - **User Management & Security:** Built secure user profiles, notification settings, and structured file metadata handling for profile photo uploads.
- Managed data storage design, optimized complex queries, and streamlined relations across PostgreSQL and MongoDB instances.
- Participated actively in team code reviews, maintaining architectural stability, and collaborating with frontend teams to integrate business logic.

Barista

Apr 2024 – Jun 2024

AxisTower — Tbilisi, Georgia

- Delivered high-quality customer service under peak-hour pressure, sharpening strong communication and adaptive teamwork skills.

PROJECTS

Automated Intelligent Employee Evaluation System (Cloud & AI Automation)

Enterprise Cloud Technologies Course

Designed and deployed an end-to-end automated enterprise application using Power Apps, Power Automate, and SharePoint. Integrated Azure AI Builder (Sentiment Analysis) into the live workflow to automatically process text comments, detect emotional sentiment (Positive, Negative, Neutral), and evaluate overall employee status with zero manual oversight. Configured a background data logging system paired with automated dynamic alerting systems via Outlook Email and Push Notifications.

AI-Powered Task Summarizer API (Personal & AI-Assisted)

Node.js, TypeScript, Express, LLM API Integration

Developed a specialized RESTful backend designed to ingest user notes and tasks, running them through external AI endpoints (Claude/Gemini) for automatic filtering and structuring. Utilized Cursor and AI-driven programming workflows to accelerate error handling, schema migration, and route optimization.

EDUCATION

- **Bachelor of Informatics**
  Georgian American University (GAU)
  Sep 2024 – Present
- **Exchange Program (Erasmus+)**
  Instituto Superior de Engenharia de Coimbra (ISEC), Portugal
  Sep 2025 – Jan 2026

ADDITIONAL TRAINING & CERTIFICATIONS

- **GEOLAB Professional Course:** Front-End Development (HTML, CSS, React, JavaScript)
  Hands-on training in building responsive web interfaces.
  May 2026 – Oct 2026
